

COST Action FA1405

Annual Meeting on Crop-Arthropod-Microorganism interactions

JAN 31st - FEB 2nd 2017

First Announcement

The Annual Meeting of the COST Action FA1405, including WGs and MC meetings, will take place in Ljubljana (Slovenia) at the Best Western Premier Hotel Slon, hosted by National Institute of Biology.

The plenary theme of the meeting will be "Systems biology approaches to identify mechanisms underlying crop-arthropod-microbe interactions". In addition to this theme, there will be plenary contributions on impacts, mechanisms and utilization of three-way interactions between plants, arthropods and microbes. The meeting will be followed by one-day training school on "Systems biology approaches to study molecular mechanisms of multi-way interactions".

Details of the meeting and training school, including a detailed daily program, list of speakers, as well as venue, registration and abstract submission information will be available shortly at the meeting website.

Please express your interest by contacting us and we will provide you with up to date information.
